# Updating your theory for improvement

Jaqueline Ryan  
MHA QIP Project Manager

# Connecting care project timeline

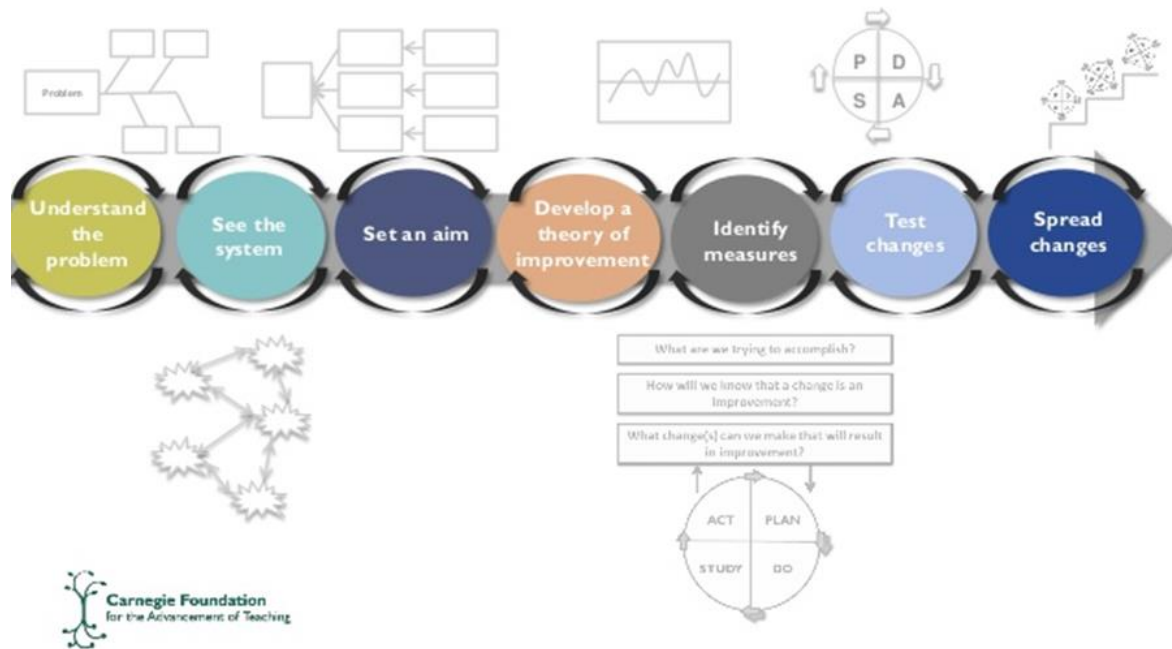

# Revisiting your theory

- Consider your aim statement, does this need revising?
- Do you need to update your theory for improvement (driver diagram), including equity, to achieve your aim?
- Prioritise where to focus to see the largest improvement and create action plan for next six months
- Do your process measures need to be updated?
- How will this link to your agreed outcome?

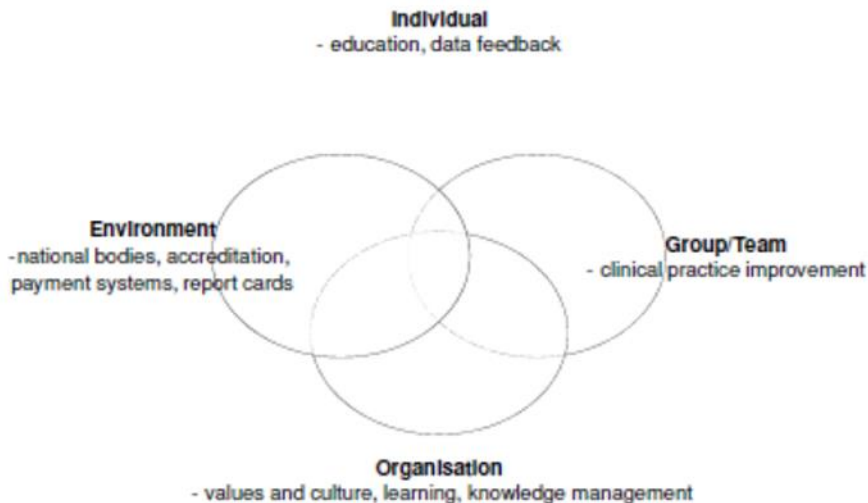

# Improvement journey

# Context

## Four Levels of Change

## Alignment Model

Vision		Strategy		Outcome				
Vision	▶	Culture	▶	Structure	▶	Resources	=	Results
?	▶	Culture	▶	Structure	▶	Resources	=	Confusion
Vision	▶	?	▶	Structure	▶	Resources	=	Resistance
Vision	▶	Culture	▶	?	▶	Resources	=	Anxiety
Vision	▶	Culture	▶	Structure	▶	?	=	Frustration

Source: Adapted from Knoster, T, Villa R, & Thousand, J (2000). A framework for thinking about systems change. In R villa & J Thousand (Eds), *Restructuring for caring and effective education: Posing the puzzle together* (pp. 93-128). Baltimore: Paul H Brookes Publishing Co

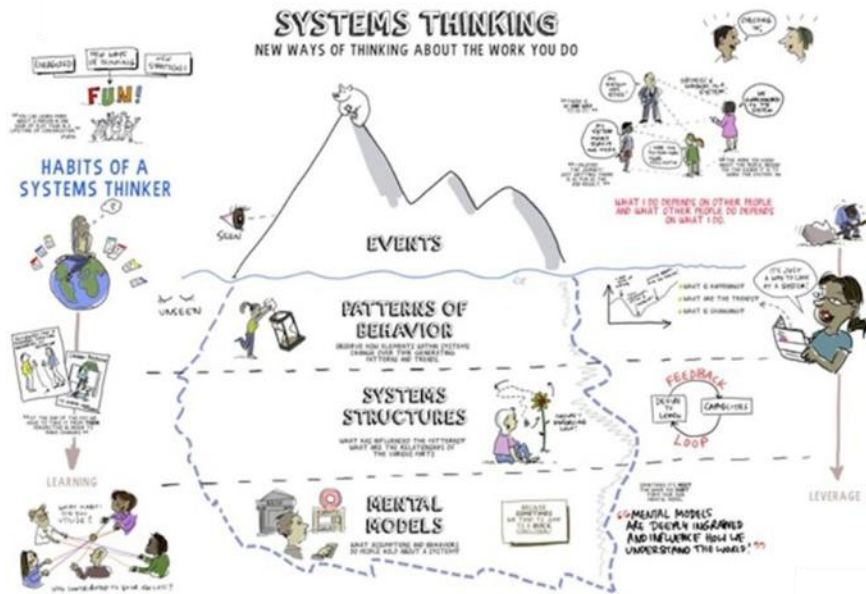

# Core concepts of improvement

## Theory of knowledge

Need to be able to articulate what you believe about why things are the way they are:

- what do you know about your system?
- how do you know?

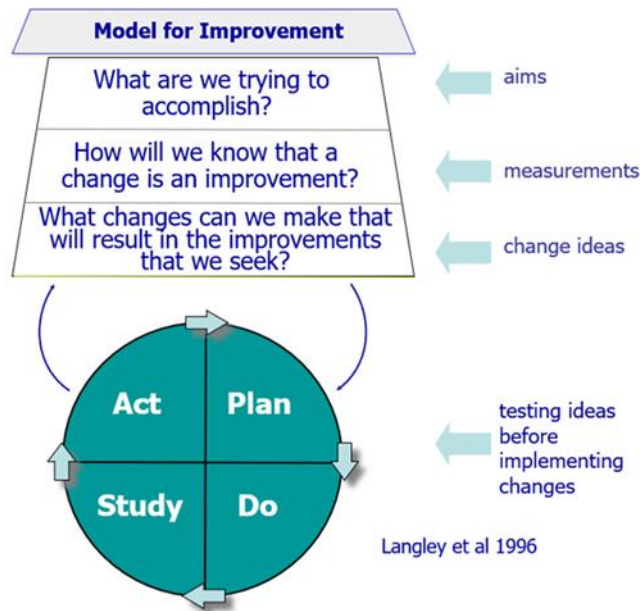

# Core concepts of improvement

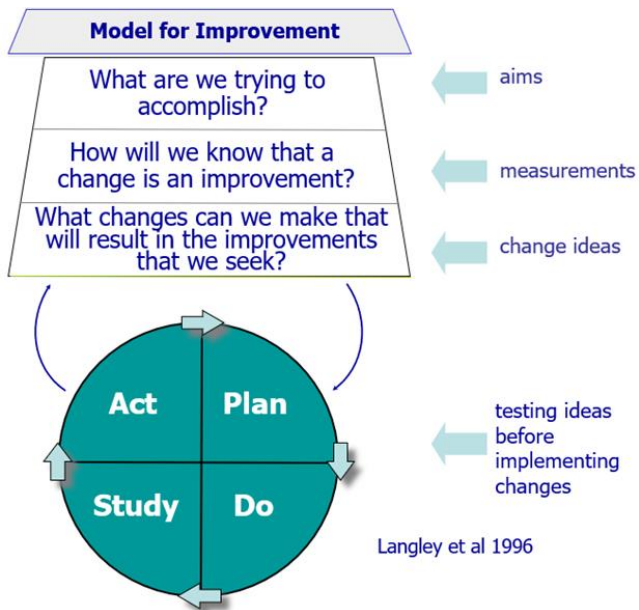

## Testing your theory

Need a method to learn whether your change ideas deliver in practice

# Who are our people? What unites us (our shared purpose)?

# Engaging the team

Shared purpose goes way deeper than vision and mission; it goes right into your gut and taps some part of your primal self. If you can bring people with similar primal-purposes together and get them all marching in the same direction, amazing things can be achieved.

**'I have some key  
performance indicators  
for the next 12 months'**

HOSPITAL

## Campaign to 'end PJ paralysis' saved 710,000 hospital days

21 AUGUST, 2018 | BY JO STEPHENSON

A national campaign to end “pyjama paralysis” has helped reduce falls and pressure ulcers and cut the length of time people spent in hospital, according to an evaluation.

# If we want people to take action we have to connect with their emotions through values

Source: Marshall Ganz

# Create a statement of purpose

- Consider how the sense of ‘us’ (shared values and ambitions) can be translated into a statement of shared purpose that you can all unite around
- Create a purpose, not an aim
- Does it pass the ‘purpose’ test?

# The purpose test: does your proposed purpose fit with this?

‘Purpose is the deepest dimension within us – our central core or essence – where we have a profound sense of who we are, where we came from and where we’re going.

Purpose is the quality we choose to shape our lives around. Purpose is a source of energy and direction.’

Leider

# Break out – our shared purpose

# Aim statement

- Improvement requires setting aims
- An organisation will not improve without a clear and firm intention to do so
- The aim should be time-specific and measurable (SMART = specific, measurable, applicable, realistic, and timely)
- It should also define the specific population that will be affected
- How much by when?

# Aim statement

- Example 1: Through an improved discharge process and communication at least 80% of people discharged from xx MHS to Primary Care will be seen by their GP for review within 28 days, by 1 December 2019
- Example 2: We aim to improve service transitions for youth service users (18-25 year-olds) in mental health services

## Connecting Care driver diagram

### The Problem:

Improve transition of care from acute care to community supported care for tangata whaiora to maintain mana and flourish in the community

**Outcome measure:**

**Equity**

**Process measure:**  
• How much:  
• By when:

**Balancing measure:**  
• How much:  
• By when:

**Seamless care**

**Process measure:**  
• How much:  
• By when:

**Joy in work**

**Process measure:**  
• How much:  
• By when:

### Secondary drivers

Consumers, family and whānau partners in care

Health literacy

Bias awareness

Visibility of data

Cultural support and engagement

Workforce development

Communication

Collaboration and partnership

What matters

Distributed leadership

### Change ideas

Whānau partners in care

Whānau support

Deep listening

Peer navigators

Unconscious bias competency

Workforce development

Transition plans

Service redesigns

Use of data

Links to community

Use of technology

Timely access to care

Effective plans

PDSA of the week

### Priority change ideas

# Equity perspective

- Health equity is deliberate efforts to ensure all people have full and equal access to opportunities that enable them to lead healthy lives
- To achieve health equity, we must treat everyone equally and eliminate avoidable health inequities and health disparities

# Connecting care outcome measures

- Māori more likely to be referred from Police back into services after discharge
- Māori are more likely to have referral ended from lack of consumer engagement / failing in relationship
- However, Māori less likely to have an ED presentation MHA related in 28 days after index discharge

	Inpatient to DHB community transition	
<i>Within 28 days after index discharge:</i>	<b>Māori</b>	<b>Non-Māori</b>
(A) Referred from Police	4.3%	3.6%
(B) Lack of consumer engagement / failing in relationship	6.4%	4.3%
(C) Emergency department presentation MHA related	9.1%	11.0%
<b>Overall – any of the three criteria</b>	<b>16.9%</b>	<b>16.2%</b>

# Already published process measures

[KPI Programme data]

- Māori are less likely to receive a follow-up contact in the community within 7 days after discharge
- Māori are less likely to receive pre-admission community care in the 7 days prior to inpatient admission

% post-discharge community care rate  
2018/19

% pre admission community care  
2018/19

# Staff views of transitions

- 'Tāngata whaiora care/support is well coordinated between DHBs and NGOs/primary care'
- Nationally, 26% of staff responded positively to this question (lowest question overall)
- Higher for Māori staff in a kaupapa Māori service (38%)
- Lower for non-Māori staff (24%)
- *Health Quality & Safety Commission, Ngā Poutama staff survey, August 2018*

# We need to improve service transitions for all and reduce inequities

Inequity maintained

Inequity increased

Inequity reduced

# Break out – revisiting your theory

- Consider your aim statement, does this need revising?
- Do you need to update your theory for improvement (driver diagram), including equity, to achieve your aim?
- Prioritise where to focus to see the largest improvement and create action plan for next six months
- Do your process measures need to be updated?
- How will this link to your agreed outcome?
